II.1.c Subsection without title	2
II.2 Symbols and Text Formatting	2

Introduction

This document details the procedure for editing the constitution, bylaws and financial policy of the TBP-Γ Chapter.

Part I Procedure

SECTION I.1 REPOSITORY Before even thinking of editing any of the documents, create a branch of the repository to work on. The branch should be named "changes;semester;" (Ex: changesF26). The branch should exist and main repository should remain unchanged until all edits have been verified (see I.3).

SECTION I.2 CHANGELOG During the lifetime of your editing branch(I.1), a changelog must exist, ideally a google/word document with each change made. I highly suggest separating changes to different documents, and noting the section or subsection that the change takes place. The changelog should be accessible via the chapter google drive.

SECTION I.3 EDITING RULES The editing rules for the documents is as follows:

- (a) **FORMATTING:** All changes to any of the documents should follow the formatting detailed in Part II.
- (b) **SECONDARY INSPECTION:** All changes should be double checked by yourself and ideally another for errors.
- (c) **BRANCH MERGING:** The branch(I.1) should only be merged after:
 - (i) Any document that has been edited has been read through for any missed errors or broken latex.
 - (ii) The relevant **Last Revised** dates have been updated.
 - (iii) **Bylaws Specific:** All changes in the changelog(I.2) have been inputted into the **Bylaws Amendment Report** to the Association.

Part II Formatting

The formatting of these documents has been chosen arbitrarily by those who have come before. For the sake of your(and future editors') sanity, please abide by this formatting. If anything isn't covered in this section, look to examples in the documents for what you are trying to do. Unless you have extensive knowledge in Latex, I wouldn't suggest doing anything novel.

SECTION II.1 SECTIONING This is a latex subsection. I know it says section, but in the latex code, it is a subsection. For any new section or subsection, ensure there is a label, for future linking.

- (a) **SUBSUBSECTION:** This is the standard formatting for a subsubsection.

- (b) SUBSUBSECTION CONTINUED: As you can see, a predefined command has been supplied for creating this style of subsubsection. This command ensures that you can link to the subsection and that it shows up in the table of contents.
- (i) This item(latex paragraph) will show up in the table of contents due to a predefined command. **This command exists for the government bylaw, and should never be used.**
 - (ii) This item does not show up in the table of contents, but can be linked to using another predefined command(ex: [II.1.b.ii](#)). Ideally, these items are short enough that a reference to the enclosing section should be enough. If one item in a list is defined with the paritem command([II.1.b.i](#)), then the rest should also(Obviously not the case here).
- (c) This subsection will show up in the table of contents, but does not have a title in the body. Please don't use this, apart from the areas where it is already in use.

SECTION II.2 SYMBOLS AND TEXT FORMATTING All fractions should be in the sfrac styling, such as $\frac{4}{5}$.
